Art Unit: 3612

DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-8, drawn to a subcombination platform, classified in class 108, subclass 51.11.
- II. Claims 9-14, drawn to a truck bed, classified in class 296, subclass 26.03.
- III. Claims, drawn to a combination vehicle, classified in class 296, subclass1.07.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions III and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because a sheet of material is not required. The subcombination has separate utility such as use as a warehouse shelf.
- 3. Inventions III and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because at least an accessory extending

Page 3

width per se is not required. The subcombination has separate utility such as use in a pickup truck/vehicle with cargo bed.

- 4. Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because a sheet of material is not required. The subcombination has separate utility such as use in a warehouse shelf.
- 5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
- 7. This application contains claims directed to the following patentably distinct species of the claimed invention: vehicle configurations of fig 1 vs fig 3 vs fig 5 vs fig 7 vs fig 9 vs fig 10A vs fig 10B vs fig 10J vs fig 11A. Additionally note, if figure 7 is selected, then election of subspecies of extension piece between figure 8A and figure 8B is required. If figures 10A or 10B are selected, then election between subspecies of accessory configuration as shown in figure 10A vs fig 10B vs fig 10C vs fig 10D vs fig 10E vs fig 10F vs fig 10G vs fig 10H vs fig 10I.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims appear to be generic.

Page 4

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

8. Due to the complexity of the above election/restriction, the requirement is being submitted to applicant in written form to allow ample time to address the issues raised.

Art Unit: 3612

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be

traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen Gordon whose telephone number is (703) 308-2556. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
